

# BLOCKSPACE PROGRAM

SCHOOL EDITION

ABOUT  
PUNGROW

Pungrow blocks are a system of 6-side-interlocking building blocks with around 300 basic types of blocks available in 4 sizes, 16 colors, 6 shapes, and 1-4 tenons.

Due to their unique design of the mortise and tenon structure, Pungrow blocks are extremely flexible in connection that each block is connectable to others by their mortises & tenons on any side.

300  
Types  
Of  
Blocks

4 Sizes

6 Shapes

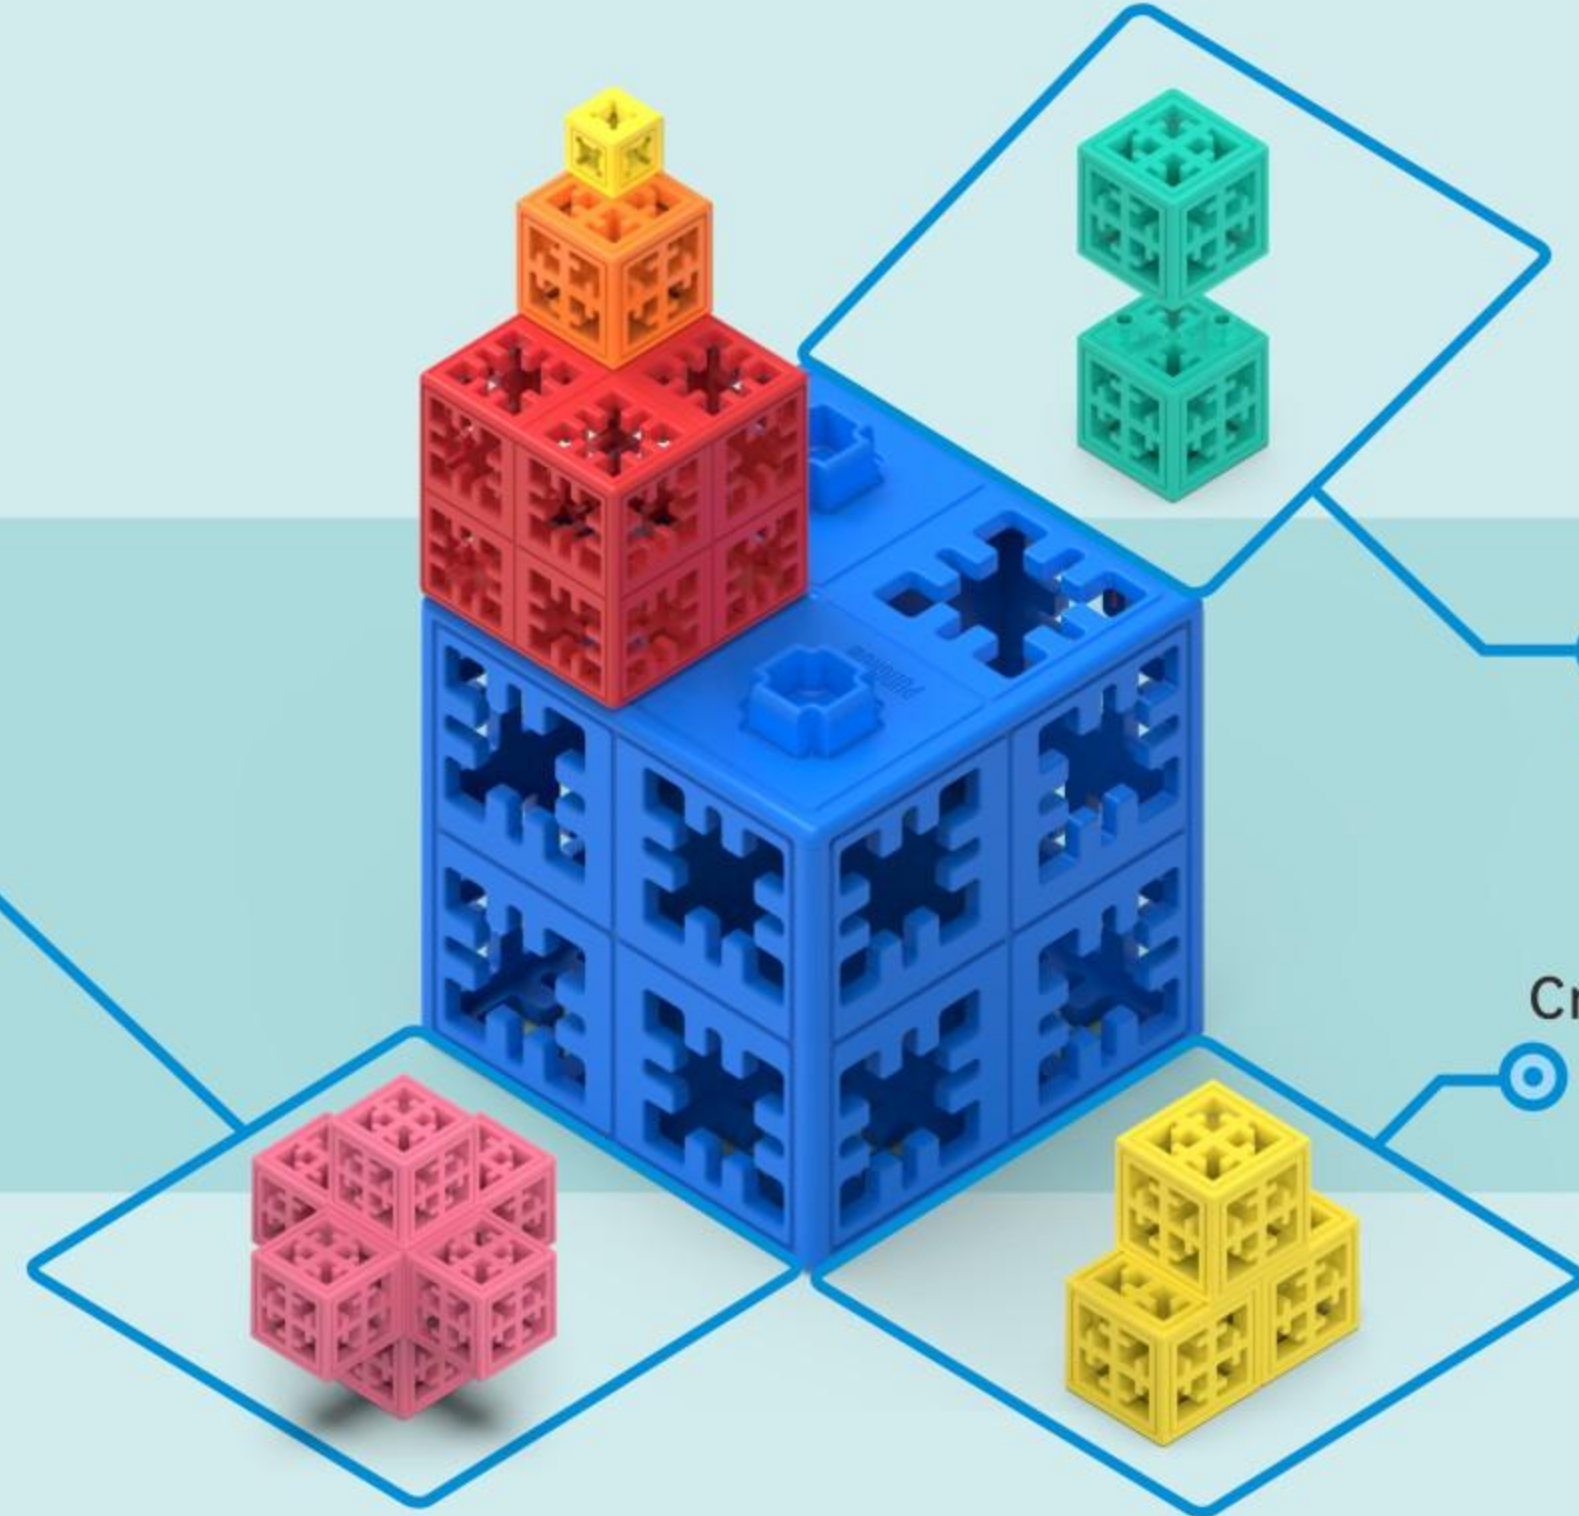

1-4 Tenons

6 sides  
connection

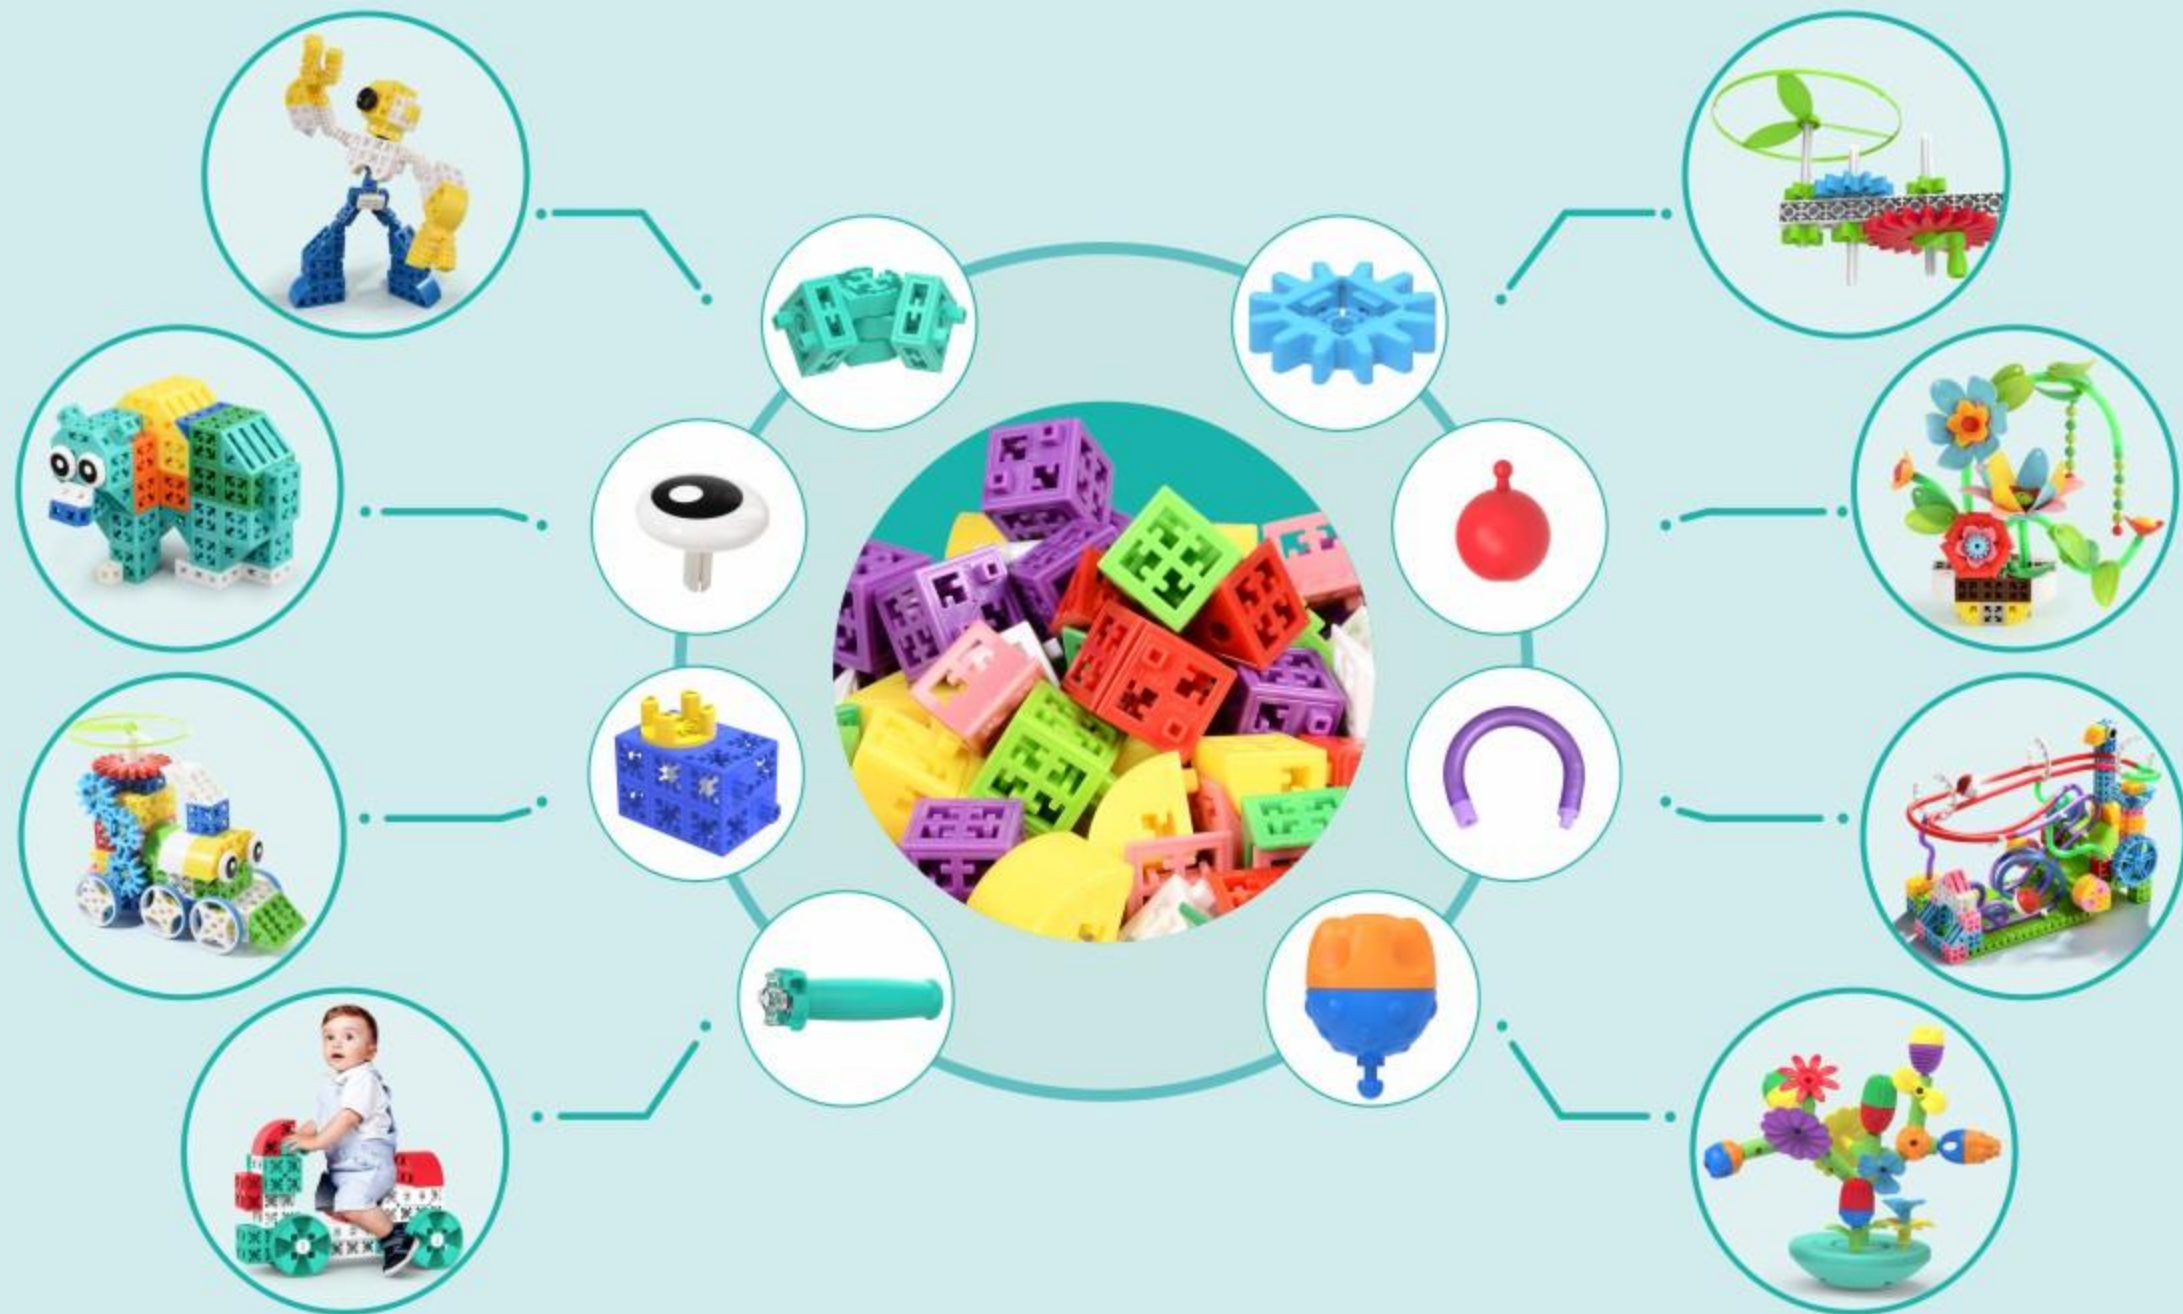

Hiding  
connecting  
points

Cross-border  
connection

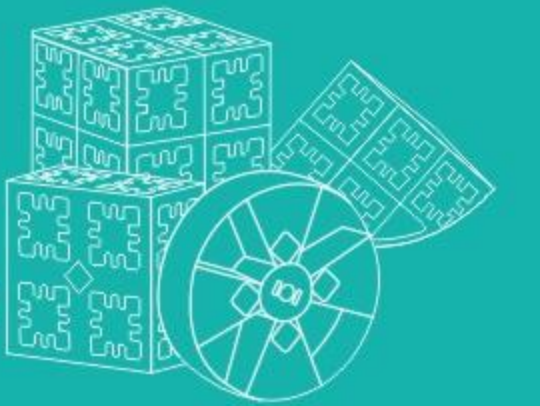

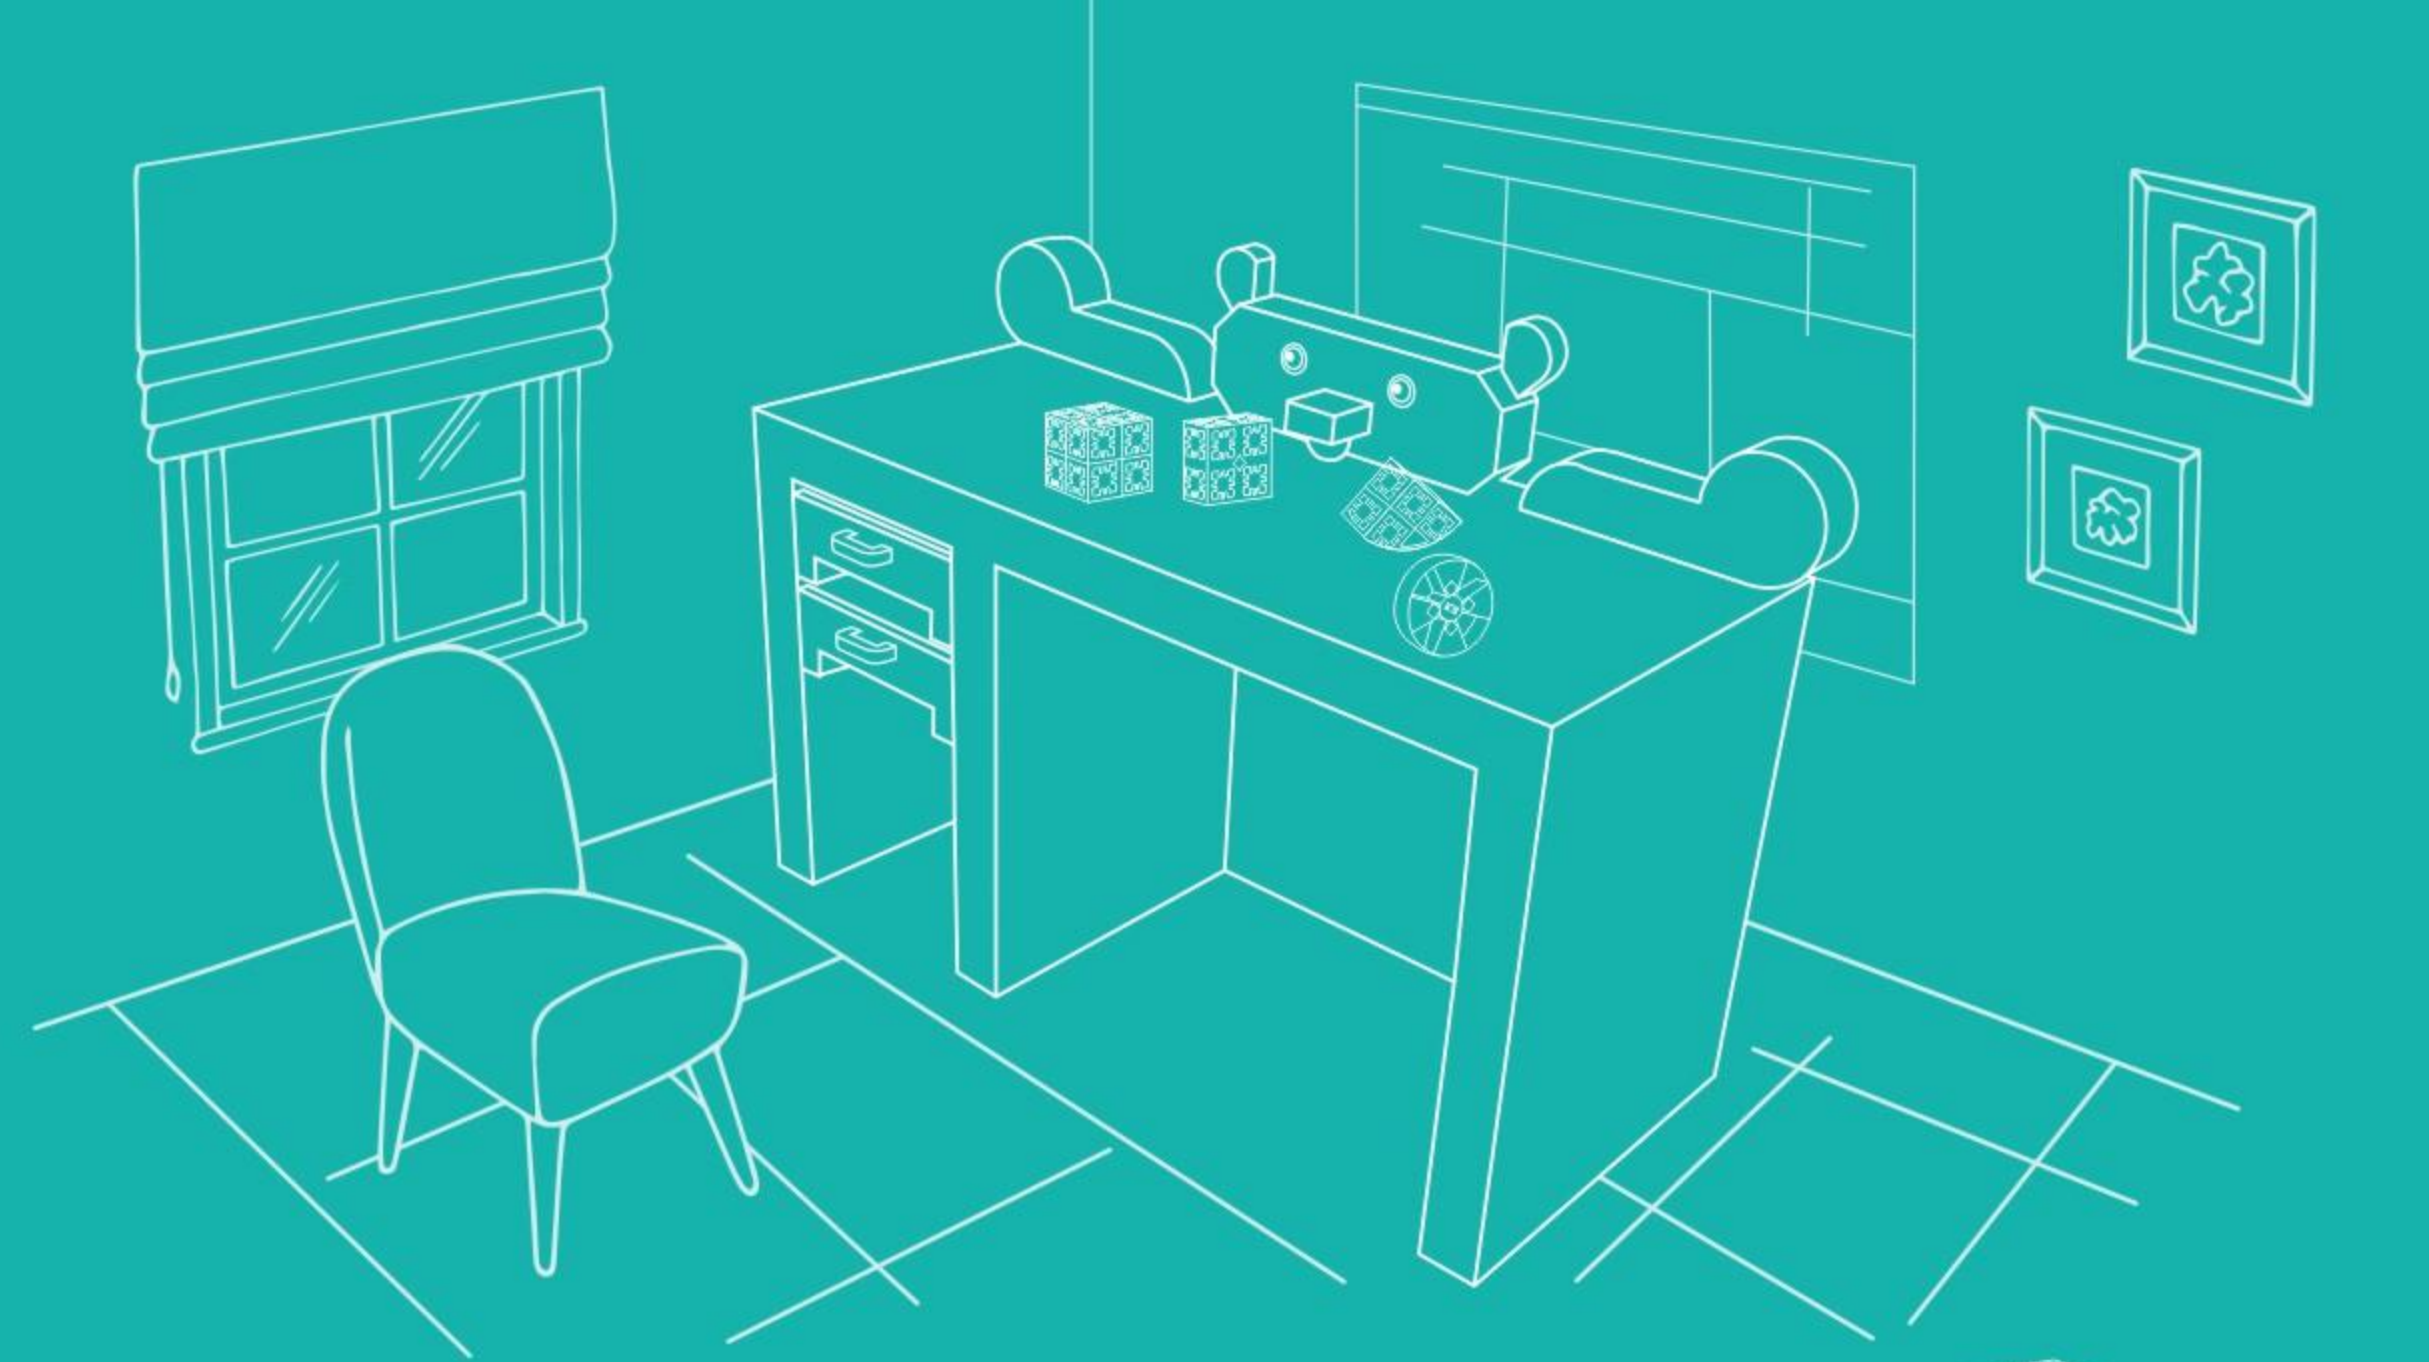

When paired with different Pungrow accessories, Pungrow blocks can be used to create unlimited designs, and provide a variety of educational games to help children develop skills & abilities.

# What is BlockSpace Program For School?

The Pungrow BlockSpace Program for school is a remodeling project designed with Pungrow blocks to help kindergartens, early educational institutions, and primary schools to turn areas like classrooms, activity halls, and multifunctional rooms, into a playground allowing children to learn while playing.

Creation Wall

Block Figures

Block Furniture

Toy Sets

Creation Table

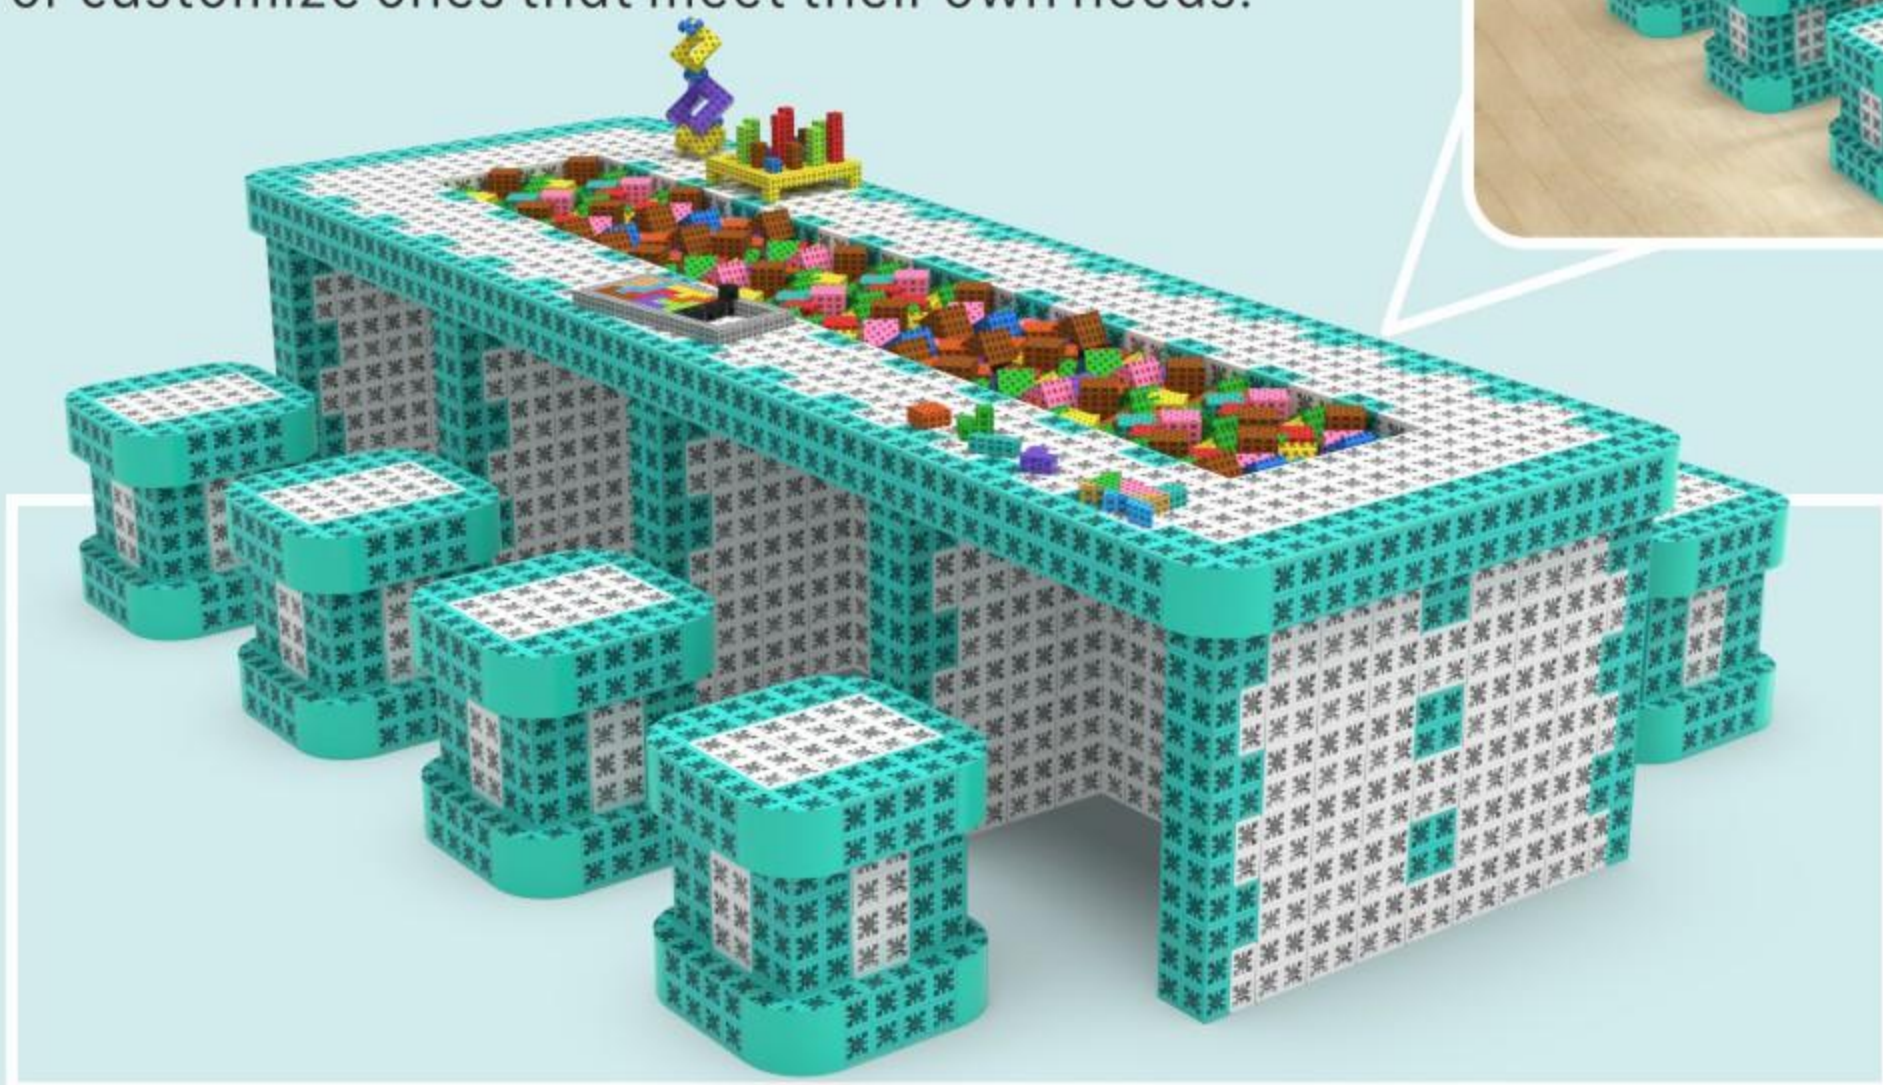

Schools are free to choose the program's standard items including creation tables, creation walls, toys, wall graphics, figures, and furniture, or customize these items based on their own budgets & needs to create a distinctive, lively and educational environment for children.

# Creation Table

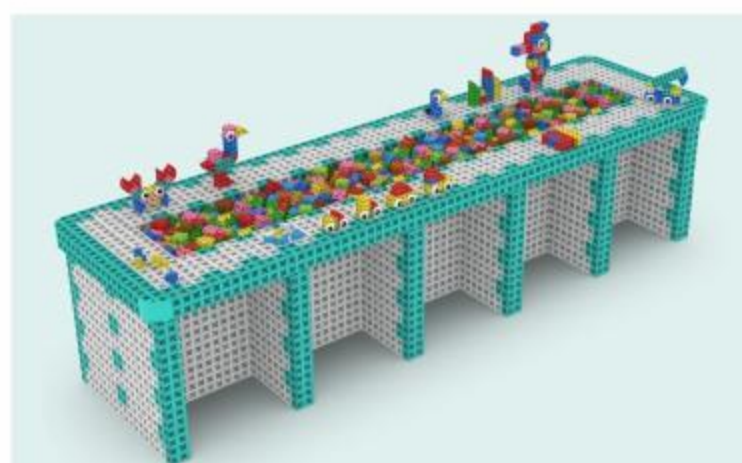

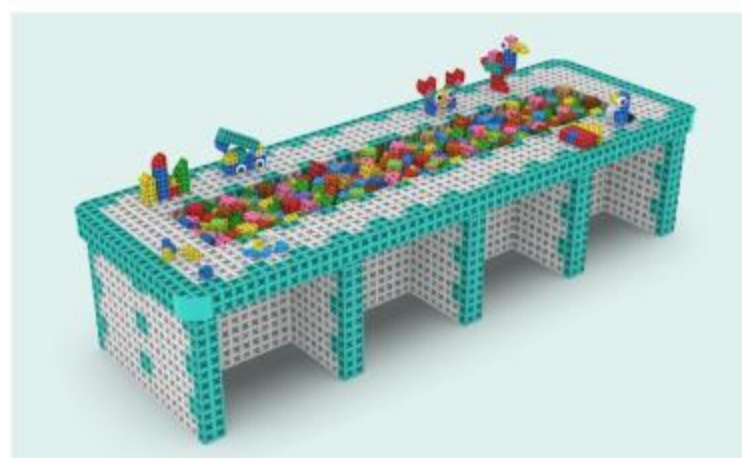

The creation table is a block table where children can sit around to create designs or play games with Pungrow toys. It is built with P8 square blocks, P8 circular sectors, and P8 patches. Schools can purchase standard creation tables, or customize ones that meet their own needs.

## ● Standard Creation Table

The standard creation table is available in 7 lengths (able to be accommodated for 4-16 seat), 2 heights (for kindergarten & primary school), and 2 structures (with storage groove & without storage groove). The creation table with storage is designed with a recessed area in the middle of the table for easy access and storage of blocks for children every time they play.

### ● 56cm Height (With Groove)

## ● Custom Creation Table

The accurate cost of a custom creation table is determined when it is completed based on the pieces count of materials in the final product, but an estimated cost can be acquired with reference to similar standard creation tables. A bill of materials will be submitted to customers listing the pieces count of materials along with all consisting prices after the final product is confirmed.

①

The cost of a standard creation table is composed of material cost and production fee; Therefore, the cost of a custom creation table can be estimated based on similar standard creation tables plus the design fee.

②

Production Fee= Pieces count of Materials x Production Labor Rate/ pcs (\_\_\_\_\_/ pcs).

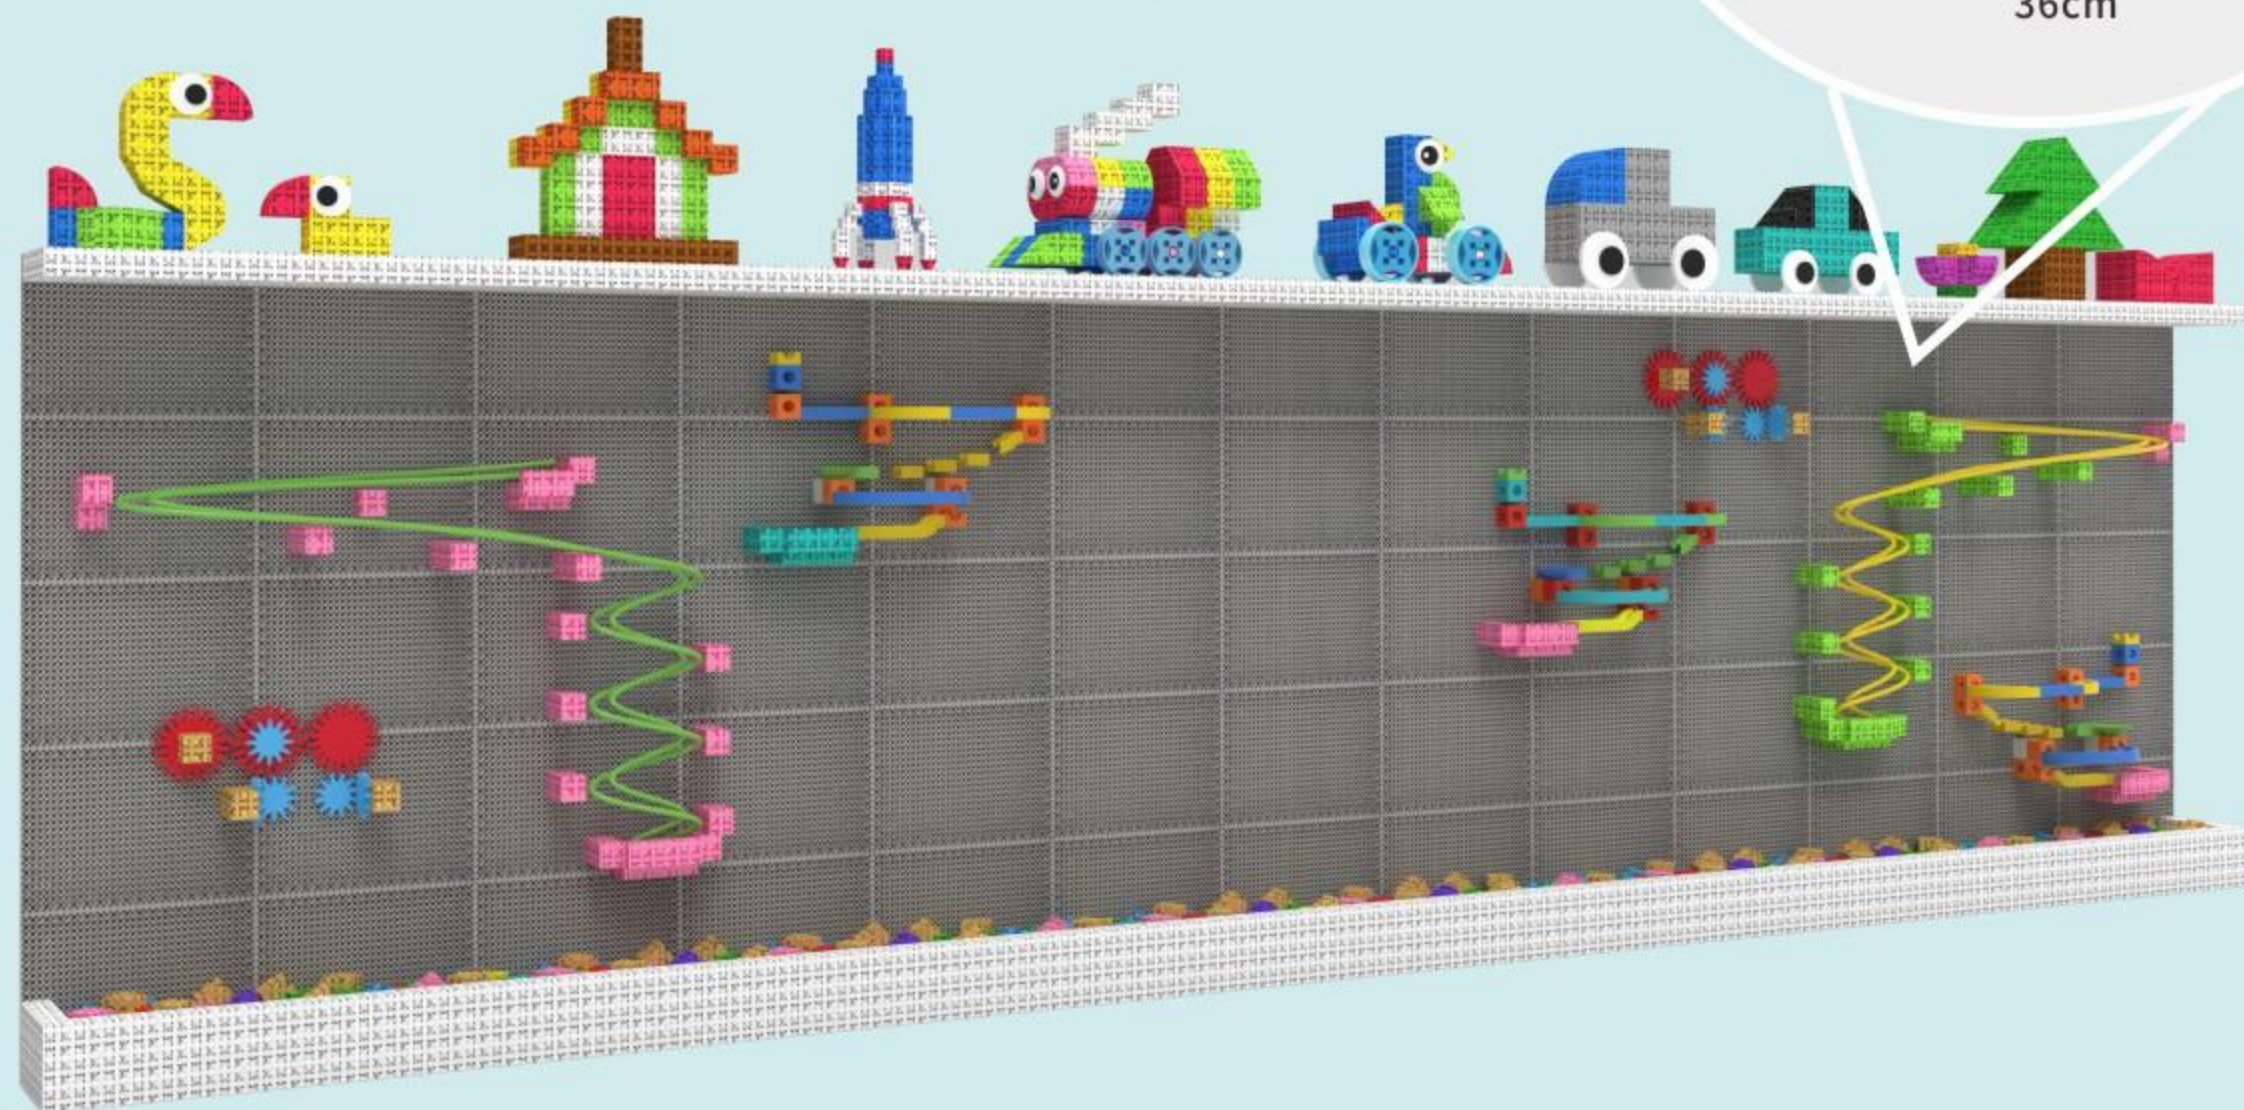

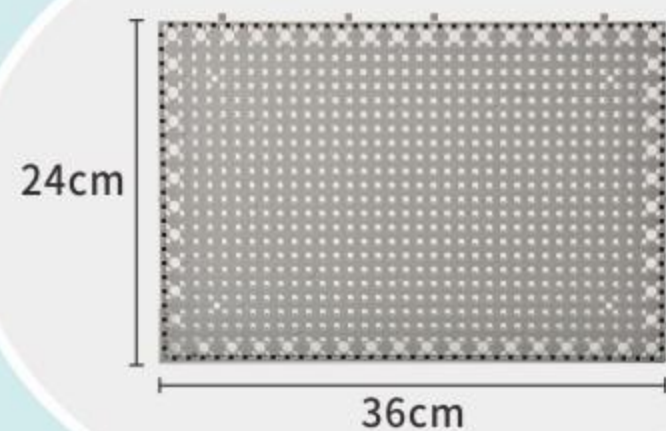

③

Design Fee= Pieces count of Materials x Design Labor Rate/ pcs (\_\_\_\_\_/ pcs). The design fee is only charged once for the purchase of multiple tables of the same custom design.

# Creation Wall

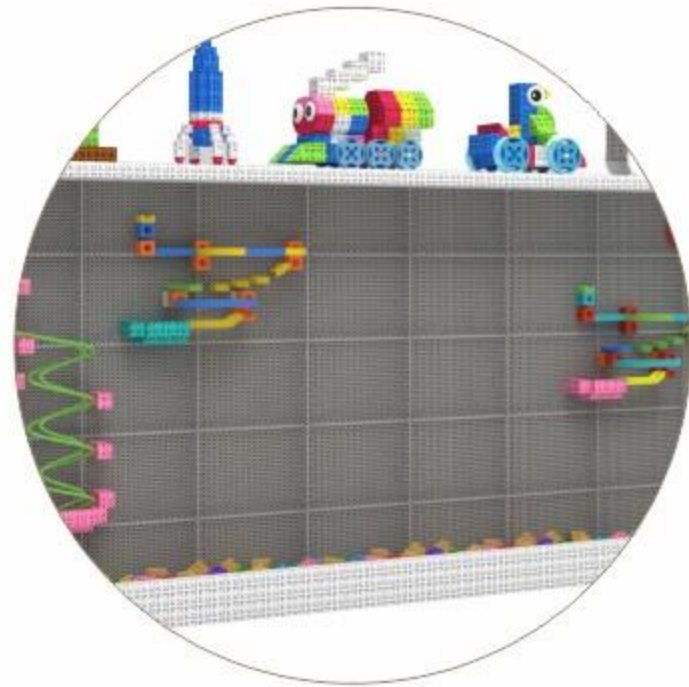

The creation wall is a creation platform mounted on the wall for children to create designs onto the baseboard background, and it is built with the 36cm x 24cm baseboards, P4 patches, building blocks, and accessories, and is tailored to meet school needs and wall conditions.

## ● Creation Wall of Default Heights

The default height of the creation wall is 1.2 meters/ 3.94 feet (suggested for kindergartens) and 1.44 meters/ 4.72 feet (suggested for primary schools), and the height can also be adjusted according to school needs. The cost is calculated by the wall length (the price includes material cost and installation fee). The minimum order of quantity for each wall is \_\_\_\_\_ meters/ feet in length. A storage groove can be added at the bottom of the creation wall for easy access and storage of blocks for children every time they play. A storage rack can be added at the top of the creation wall for placing reference designs or small designs created by children.

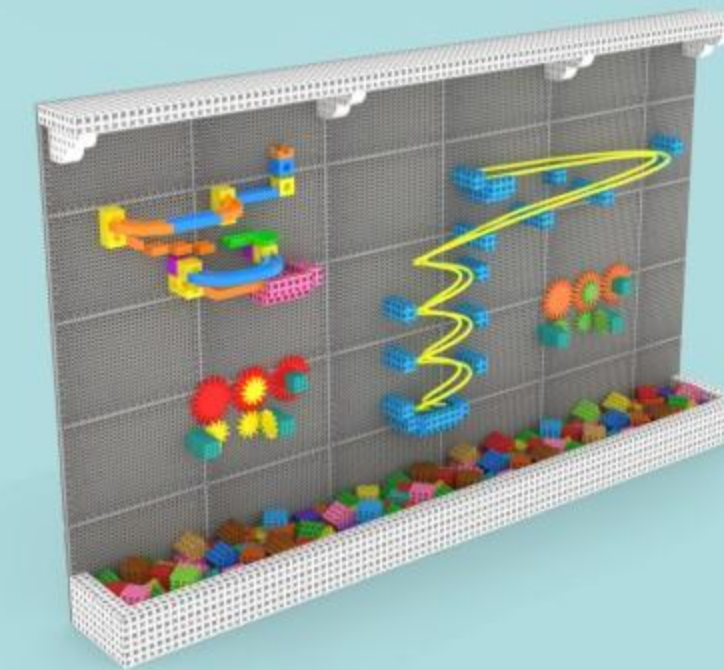

### Creation Wall 12RG

**Height:** Default 1.2m/ 3.94 ft

# Wall Graphics

The wall graphics are fully customized wall art often built with P1 or P2 blocks on baseboards. Schools regularly use wall graphics for aesthetic purposes, as they can improve the appearance of the walls. With wall graphics, schools can craft lively environments that reflect their identity.

## ● Custom Wall Graphics

The accurate cost of a wall graphic is determined when it is completed based on the pieces count of materials in the final product, but an estimated cost can be acquired with reference to previous wall graphics. A bill of materials will be submitted to customers listing the pieces count of materials along with all consisting prices after the final product is confirmed.

① The cost of a wall graphic is composed of material cost, production fee, design fee and installation fee; Therefore, the cost of a custom creation table can be estimated with reference to the previous wall graphics. But note that when estimating the cost, not only the size of the wall should be considered, but also the content design of the graphic. Wall graphics with different design (for example, using different sizes of blocks and different block densities) will lead to great cost differences, even though the wall graphics are the same size.

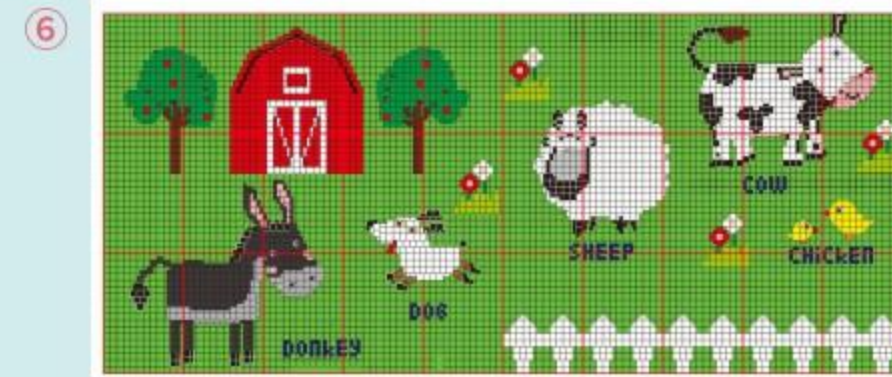

② Production Fee= Pieces count of Materials x Production Labor Rate/ pcs (\_\_\_\_\_/ pcs).

③ Design Fee= Pieces count of Materials x Design Labor Rate/ pcs (\_\_\_\_\_/ pcs). The design fee is only charged once for the purchase of multiple wall graphics of the same custom design.

④ Installation Fee= Total Area x Installation Labor Rate (\_\_\_\_\_/\_\_\_\_\_)

# Block Figures

Pungrow block figures are decoration figures built with various sizes, shapes, and colors of Pungrow blocks. They are artistic and eye-catching to be placed inside or outside a classroom to make a school space more appealing and inviting for children and parents. Pungrow figures are typically available with a wide selection of animals, vehicles, and cartoon characters. Schools can purchase ready-made figures or design their own figures based on their mascots or favorite characters.

Total Cost of Custom Creation Table

Material Cost

Production Fee

Design Fee

The accurate cost of a custom figure is determined when it is completed based on the pieces count of materials in the final product, but an estimated cost can be acquired with reference to similar standard figures. A bill of materials will be submitted to customers listing the pieces count of materials along with all consisting prices after the final product is confirmed.

①

The cost of a standard figure is composed of material cost and production fee; Therefore, the cost of a custom figure can be estimated based on similar standard figures plus the design fee.

②

Production Fee= Pieces count of Materials x Production Labor Rate/ pcs (\_\_\_\_\_/ pcs).

③

Design Fee= Pieces count of Materials x Design Labor Rate/ pcs (\_\_\_\_\_/ pcs). The design fee is only charged once for the purchase of multiple figures of the same custom design.

# Block Furniture

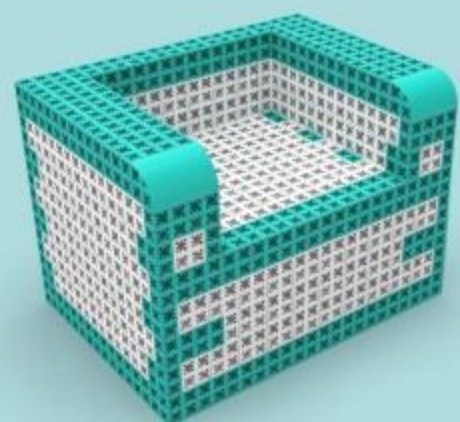

Pungrow furniture are built with large size of Pungrow P8 blocks and accessories, and reinforced by P8 patches. Schools see block furniture as a way to break free from the stereotypical plain, personality-less spaces. Because they add an artistic feel to the offices & classrooms, Pungrow block furniture are typically good for improving the feel of a school's environment and help make school life more enjoyable. Pungrow block furniture are typically available with a wide selection of shelves, chairs, desks, tables, beds and lockers. School can purchase ready-made furniture or design their own furniture according to actual needs.
